THE PHILADELPHIA SOCIETY'S FALL MEETING

OCTOBER 18-19, 2019 – THE RITZ-CARLTON TYSONS CORNER – MCLEAN, VIRGINIA

POPULISM, MARKETS, AND POLITICAL ECONOMY

Conservatives and classical liberals in America and elsewhere are increasingly divided around questions of political economy. After a long period in which support for market economies formed part of the right's agenda for change, more conservatives and even some classical liberals are questioning the economic, cultural, and political implications of free markets. What does this growing division mean for the right? What does it mean for the relationship between conservatives, classical liberals, and libertarians? Is it possible to agree to disagree? Can the case for free markets be reinvigorated within American conservatism? Why does it matter for the world?

Friday, October 18
